PROJECTS

News Recommendation and Summarizer (Minor Project)

- Created an algorithm that suggests news based on what a person likes and has been looking at online.
- Made short descriptions of articles by using artificial intelligence and other technologies related to understanding human language.
- What was done: Python, NLP libraries, Machine Learning frameworks

E-Learning Platform (Final Project)

- Developed a comprehensive React-based e-learning platform to facilitate online course delivery and student engagement.
- Implemented key features including user authentication, course management, content presentation, and progress tracking functionalities.
- Designed an intuitive and responsive user interface to enhance the learning experience across various devices.

EXPERIENCE

Frontend Designer

- Designed and implemented user-friendly interfaces for websites and applications.
- Collaborated with cross-functional teams to translate design concepts into functional products.
- Improved user engagement and satisfaction through visually compelling and intuitive designs.
- Technologies used: React/React.js, HTML5, CSS, JS
- Portfolio: https://github.com/raaichu121

ADDITIONAL
